### **UFO investigative writer and NASA Employee: Jacques Vallée**

"The Aviary" was a group of individuals who, rather than being just a number of low grade intelligence agents, were working (or had worked) at very high levels with very high security clearances; it is almost certain that they became involved in the UFO phenomenon in the early 1970s and included both active and retired military and intelligence officers.

It seemed that their primary objective was to make known to the general public, details of the government's involvement with extraterrestrials and technology gained from crashed UFOs etc... However, it is probable that the members of the Aviary had joined forces in order to gather information on the Majestic-12.

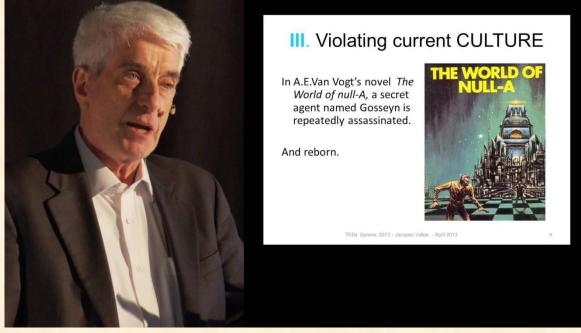

As members of the intelligence community, they had all been involved with or had contacts in the UFO field and their aim was to access secret files and gather information which would provide them with a greater understanding of that "above

top-secret, shadow group" - the Majestic-12.

Jacques Vallee Ph.D. - "Partridge"

Defense Department computer expert, previously investigated UFOs for the French Government

#### **Solutions:**

Ask why? Say No! And stop living in fear..... the elites are losing control over the E.T. contact phenomenon..

Telling the truth and making someone cry is better than telling a lie and making someone smile.

Paolo Coelho
